

### Warm-Up 34

1) $-12 - 58 - (-34) =$  7.NS.3	4) A coin is flipped and a number cube is rolled. Use a tree diagram to find the probability of getting heads and a number greater than 2?  7.SP.8a
2) If the price of an item is represented by p, a final price of $0.7p$ indicates a discount of what percent?  7.EE.2	5) One of two supplementary angles is $118^\circ$ . Let $x =$ the measure of the other supplementary angle. Write and solve an equation to find the measure of angle x.  7.G.5
3) Solve the problems below and give the answer (same for each) as a fraction in simplest form:  $-12 \div 15 =$ $12 \div (-15) =$ $-(12 \div 15) =$  7.NS.2b
